

BENEFITS OF DONATING BLOOD

Your Blood. Their Hope.®

MILLER-KEYSTONE
BLOOD CENTER

#1 Benefit - The simple process of donating blood will save numerous lives. The blood goes to those suffering from cancer, severe burns, leukemia, anemia, hemophilia and others undergoing surgery.

But did you know that it might save your life too?

Mini-Physical with Every Donation: During the physical examination, which is always conducted before you donate blood, your blood pressure, pulse, temperature and iron level are checked. Sometimes physical problems such as high blood pressure are found during a blood donation mini-physical. Donating blood can be a way to keep a check on your own health while helping others.

Cholesterol Testing is provided as a public service to all blood donors each time you donate.

Determine Your Blood Type: For those who may not know your blood type, this is a perfect opportunity to find out, in case you happen to need blood in the future.

Lifesaver Rewards: Our LifeSaver Rewards program recognizes and rewards dedicated blood donors for saving lives through voluntary blood donation and helping us ensure that we always have a safe, stable, and continuous blood supply in our community. You'll earn points every time you donate blood. Simply put - the more donations you make, the more points you earn. Points accumulate and remain valid for 4 years. These points can then be redeemed in our Online Store and exchanged for a wide variety of gifts, or donated back to Miller-Keystone's Blood Center's Scholarship Fund.
